5.869.794 \$48,587,591 April 1st, 1849, to May 1st, 1850, includes only the gold dust shipped by the regular mail steamers from San Francisco. Since May 1st, 1850, shipments by all the lines of steamers have been included. It is admitted that there have been, during the past years mitted that there have been, during the past years about one hundred and fifty thousand persons engaged in California. mining for gold. It is our impression that the aggregate production of gold dust in California has been much greater than here set down. An immense amount has, no doubt, been sent out of the country by merchants and miners, of which no account has been taken. The amount of gold dust on hand, with the miners, brokers, speculators and others, and in efreulation for commercial purposes, is undoubtedly much larger than reported. As regards future production, all is doubt and conjecture. It is stated that recent developments in the gold region have demonstrated that the yield will hereafter be much greater than it has ever been yet. Discoveries of veins of very rich gold bearing quarts have been reported, along nearly the whole range of the Sierra Nevada mountains, and all that is wanted to develope the richest results is suitable machinery.
